Department of Audiology and Speech-Language Pathology

Self-study plan for the theory examinations

B.ASLP · Semesters I, III and V · December 2026 session

Source notice: YU/COE/Exam/Notification 1/Dec/2026, dated 06.11.2026, from the Controller of Examinations, Yenepoya (Deemed to be University). University theory examinations for semester I, III and V B.ASLP commence on 11 December 2026. The paper-wise timetable will be intimated shortly.

This booklet is a 29-day preparation rotation, from Thursday 12 November 2026 to Thursday 10 December 2026. It is not the examination timetable. When the Controller publishes the order of papers, keep the same topics and move the final camp days (7 to 10 December) so the last full day for a paper falls just before that paper.

How to use the days

Class evenings (most weekdays), 6:30 to 9:05 pm

6:30–6:50 pm Closed book: write what you remember from the previous level.

6:50–8:20 pm Today's unit, in your own words, with one diagram or table.

8:20–8:35 pm Break. Stand up. No phone.

8:35–9:05 pm Eight short answers. Tick the level only if the recall line is done.

Sunday boss, about 8:30 am to 4:30 pm

8:30–11:00 am First paper, notes allowed for the first hour only.

11:15 am–1:15 pm Second paper, same rule.

2:30–4:15 pm Mixed recall. Book closed.

4:15–4:30 pm Error log: three points you will redo, then tick the level.

Friday 27 November, if the University confirms the holiday

9:00 am–12:00 pm One deep pass of today's paper. Diagrams first.

12:00–2:00 pm Rest and a meal. This is a holiday, not a night shift.

2:00–4:30 pm Questions and one timed set. Tick the level.

Final camp, 7 to 10 December

8:30 am–12:30 pm Full pass of the camp paper. Mark only the gaps.

2:00–4:30 pm Recall set on the gaps. No new reading after this.

7:30–8:30 pm Light review of the error log, then stop.

Rules that sit above the plan

1. The Controller of Examinations has not published the paper-wise timetable. Keep this rotation, then shift the last four camp days to match the order once it is announced.

2. University theory is one component. You also need 50% in internal assessment, practicals and the clinical examination, or you cannot sit the University theory papers.

3. Do not skip a clinical posting to study. Attendance stays 80% in theory and 90% in clinicals, in every subject.

4. On a class day the quest is an evening block, 6:30 to 9:05 pm. Sundays and the final camp are longer. Kanakadasa Jayanti, 27 November 2026, is a Karnataka general holiday; confirm it on the University list

before treating it as a free day.

5. Stop new topics at 6:00 pm on 10 December. Pack your hall ticket, identity card, pens and water, and sleep.

Pass mark: 50% in each theory paper, and also in internal assessment, practicals and the clinical examination. A strong theory week does not repair a failed practical or a clinical attendance shortage.

Ticks on the website stay in the student's browser. This PDF is the copy to print and keep.

Semester I

The Precision Clinicians, first year. Four theory papers: B1.1 to B1.4. B1.5 and B1.6 are practicals and stay on the clinical timetable.

Theory papers in this campaign

B1.1 Introduction to Speech-language Pathology (Theory 50 + IA 25)

B1.2 Introduction to Audiology (Theory 50 + IA 25)

B1.3 Anatomy and Physiology of Speech and Swallowing (Theory 50 + IA 25)

B1.4 Anatomy and Physiology of Hearing (Theory 50 + IA 25)

1. Thu 12 Nov · Evening quest · B1.1

Speech chain and the bases of speech

- Speech, language and communication, and how they differ.
- Servo system, Shannon-Weaver, Lasswell and Berlo, drawn once each.
- Speech chain and speech as an overlaid function.

Tick this level only after: Define speech, language and communication, then draw the speech chain with no notes.

2. Fri 13 Nov · Evening quest · B1.2

Decibels, hearing range and the JND

- Absolute and relative units, and why the decibel is used.
- MAP and MAF, and the human hearing range.
- Just noticeable difference for intensity, frequency and time.

Tick this level only after: Explain MAP versus MAF in four lines, and give one clinical use of the JND.

3. Sat 14 Nov · Evening quest · B1.3

Planes, larynx and the articulators

- Anatomical terms, positions and planes.
- Development of the larynx and respiratory structures.
- Respiratory structures, oral articulators and the resonators.

Tick this level only after: Label a blank larynx: cartilages, folds and one intrinsic muscle, from memory.

4. Sun 15 Nov · Sunday boss · B1.1 + B1.2

Boss: chain and the audiogram key

- Morning: speech chain and one model, closed book after 9:30.
- Midday: hearing-loss words you already know, plus dB and range.
- Afternoon: list ten terms you could not retrieve.

Tick this level only after: Write the speech chain and the air-bone symbol key without opening a book.

5. Mon 16 Nov · Evening quest · B1.4

Pinna, canal and head shadow

- Development of the external, middle and inner ear, in one page.
- Pinna and external canal: auditory and non-auditory jobs.
- Head shadow, interaural intensity difference and interaural time difference.

Tick this level only after: Explain, with a sketch, why a high-frequency sound is shadowed by the head.

6. Tue 17 Nov · Evening quest · B1.1

Development and how therapy is planned

- Stages of speech and language development, and what changes them.
- Formal, informal and eclectic approaches.
- Goals, steps, procedures, and schedules of reinforcement.

Tick this level only after: Plan a three-step therapy goal for a late talker, using one reinforcement schedule.

7. Wed 18 Nov · Evening quest · B1.2

Types and causes of hearing loss

- Conductive, sensorineural, mixed and central: one feature each.
- Congenital and acquired; prenatal, perinatal and postnatal causes.
- How the same cause can look different in a child and an adult.

Tick this level only after: Sort eight causes into conductive or sensorineural without looking back.

8. Thu 19 Nov · Evening quest · B1.3

How speech is produced

- Quiet breathing versus speech breathing, and posture.
- Role of the larynx and the mechanism of phonation.
- How speech sounds and resonance are produced.

Tick this level only after: Trace one oral vowel from lung to lips, naming the valve at each stage.

9. Fri 20 Nov · Evening quest · B1.4

Middle ear transformer

- Tympanic membrane and the ossicular chain.
- Areal and lever ratios, in plain language.
- Eustachian tube: what it does, and what fails when it does not.

Tick this level only after: Explain the transformer action to a classmate in under two minutes.

10. Sat 21 Nov · Evening quest · B1.1

Speech disorders and swallowing, in overview

- Fluency, voice and phonological disorders: one definition each.
- Feeding and swallowing disorders, at introduction level.
- What assessment and management look like, without the later-semester detail.

Tick this level only after: Give one assessment clue and one management idea for fluency, voice and phonology.

11. Sun 22 Nov · Sunday boss · B1.3 + B1.4

Boss: larynx and cochlea

- Draw the larynx and name the phonation steps.
- Draw the cochlea in cross-section: scalae, basilar membrane, organ of Corti.
- One function sentence under each label.

Tick this level only after: Both drawings, closed book, with at least eight correct labels each.

12. Mon 23 Nov · Evening quest · B1.2

Case history and tuning forks

- What must be in an adult history and a child history.
- Rinne, Weber, Schwabach and ABC: procedure and reading.
- Advantages and limits of tuning-fork tests.

Tick this level only after: A Rinne-negative ear: say what you expect on Weber, and what it does not prove.

13. Tue 24 Nov · Evening quest · B1.3

Swallowing structures and stages

- Oral cavity structures used for the swallow.
- Pharynx and esophagus.
- Oral, pharyngeal and esophageal stages, in order.

Tick this level only after: List the stages of the swallow and one structure that must work in each.

14. Wed 25 Nov · Evening quest · B1.4

Labyrinth and the travelling wave

- Bony and membranous labyrinth.
- Cochlear fluids, hair cells, innervation and blood supply.
- Travelling wave and place: base versus apex.

Tick this level only after: Explain why a high-frequency tone peaks toward the base.

15. Thu 26 Nov · Evening quest · B1.1

Language disorders and early identification

- Child, adult and neurogenic language: how the overview differs.
- Causes, and the bilingualism points in this paper.
- Early identification and prevention.

Tick this level only after: Name two reasons a bilingual child can be over-identified, from this unit.

16. Fri 27 Nov · Holiday long quest · B1.2

Pure-tone method, on a holiday

- Kanakadasa Jayanti is a Karnataka general holiday. Confirm the University list before skipping class.
- If it is a holiday: audiometer parts, symbols, Hughson-Westlake, factors affecting AC and BC.
- If class is held: do the evening rhythm after college.

Tick this level only after: Plot a sketched audiogram and name the symbols for AC, BC, masked and no-response.

17. Sat 28 Nov · Evening quest · B1.3

Close the anatomy gaps

- Five embryonic anomalies that affect speech or swallowing.
- Fluency, voice, articulatory and resonatory disorders, as examples only.
- Redo any larynx or swallow label you missed on 22 November.

Tick this level only after: Five anomalies, each with the structure it affects.

18. Sun 29 Nov · Sunday boss · All four

Boss: twenty definitions

- Five terms from each theory paper.
- Write the definition first, then check.
- Star the ones you missed. They become 3 December.

Tick this level only after: Twenty definitions, book closed, at least fifteen correct.

19. Mon 30 Nov · Evening quest · B1.2

Speech audiometry

- Why speech audiometry is done, and which materials exist.
- SRT and word-recognition score: procedure and use.
- SDT, MCL and UCL.

Tick this level only after: State what SRT and WRS each tell you that the pure-tone average does not.

20. Tue 1 Dec · Evening quest · B1.1

The profession

- Code of conduct and the interdisciplinary team.
- Diagnostic, therapy and referral notes: what each must contain.
- Evidence-based practice, follow-up, CBR, and facilities for persons with disability.

Tick this level only after: List five headings you would put on a therapy note.

21. Wed 2 Dec · Evening quest · B1.4

Auditory nerve and the pathway

- Auditory nerve: anatomy and what it carries.
- The central pathway, station by station.
- One job of each station, in a single clause.

Tick this level only after: Recite the pathway from spiral ganglion to cortex, in order.

22. Thu 3 Dec · Evening quest · Weak units

Redo the red marks

- Open the error log from the Sunday bosses.
- One weak unit from each paper. No new chapter.
- Rewrite the diagram you keep getting wrong.

Tick this level only after: Teach one red unit aloud for five minutes with the book shut.

23. Fri 4 Dec · Evening quest · B1.2

Forks and the listening check

- Three tuning-fork patterns, written as mini cases.
- Subjective calibration and the daily listening check.
- What you must not claim from a tuning-fork test alone.

Tick this level only after: Write the daily listening check as a five-step list.

24. Sat 5 Dec · Evening quest · B1.1 + B1.3

Put the chain on the body

- Speech chain stages mapped onto respiratory, laryngeal and articulatory anatomy.
- One disorder example beside the stage it breaks.
- Leave B1.2 and B1.4 for the camp.

Tick this level only after: Point to the anatomical structure for each box of the speech chain.

25. Sun 6 Dec · Sunday boss · Two papers

Boss: a timed short-note set

- Pick the two papers you trust least.
- Ten short notes, 90 minutes, closed book.
- Mark them against your own notes afterwards.

Tick this level only after: Finish the ten notes. Score them honestly.

26. Mon 7 Dec · Final camp · B1.1

Camp: whole of speech-language pathology

- All five units, gaps only.
- Two diagrams: speech chain, and a therapy-plan skeleton.
- Fifteen closed-book recalls at the end of the afternoon.

Tick this level only after: Fifteen recalls, with the unit named beside each answer.

27. Tue 8 Dec · Final camp · B1.2

Camp: whole of introduction to audiology

- History and scope, only as a one-page map.
- Hearing loss, forks, pure tone and speech audiometry are the weight.
- One sketched audiogram and one case history.

Tick this level only after: Interpret one audiogram sketch: type, and the next test you would do.

28. Wed 9 Dec · Final camp · B1.3 + B1.4

Camp: both anatomy papers

- Morning: speech and swallowing diagrams.
- Afternoon: external, middle, inner ear and the pathway.
- Functions written under the drawings, not a new textbook chapter.

Tick this level only after: Four drawings: larynx, swallow stages, middle ear, cochlea.

29. Thu 10 Dec · Final camp · All four

Exam eve: mixed sets, then stop

- Four sets of 40 minutes, one paper each.
- No new topics after 6:00 pm.
- Hall ticket, ID, pens, water, and a sleep time you will keep.

Tick this level only after: Pack the kit. Write tomorrow's wake-up time. Close the books.

Semester III

Second-year theory papers B3.1 to B3.4. B3.5 is the minor optional and is examined by the institution. B3.6 and B3.7 are clinicals.

Theory papers in this campaign

B3.1 Child Language Disorders (Practical 25 + IA 25 + Theory 50)

B3.2 Amplification Devices (Practical 25 + IA 25 + Theory 50)

B3.3 Electronics and Acoustics (IA 25 + Theory 50)

B3.4 Psychology for Speech and Hearing (IA 25 + Theory 50)

1. Thu 12 Nov · Evening quest · B3.1

How children come to language

- Biological, cognitive and linguistic accounts, in one paragraph each.
- Birth to two years: prelinguistic to symbolic.
- Bilingual acquisition and the factors that change the rate.

Tick this level only after: Contrast two theories of acquisition with one example each.

2. Fri 13 Nov · Evening quest · B3.2

Hearing-aid types

- Microphone, amplifier, receiver, battery.
- Body, BTE, RIC, ITE, ITC, CIC, IIC.
- Hard-wired, loop, FM and infrared group systems.

Tick this level only after: Classify six aids by where they sit, and name one group system.

3. Sat 14 Nov · Evening quest · B3.3

Signals and basic electronics

- Charge, current, voltage and a simple signal.
- What a transducer does in a speech or hearing instrument.
- One sketch of a signal path from microphone to output.

Tick this level only after: Draw a signal path and name the quantity at each stage.

4. Sun 15 Nov · Sunday boss · B3.1 + B3.2

Boss: theory of acquisition, and the aid family

- One acquisition theory, taught aloud.
- A table of hearing-aid styles with one use and one limit.
- Five terms you missed, into the error log.

Tick this level only after: Fill the aid table from memory, then state one acquisition theory.

5. Mon 16 Nov · Evening quest · B3.4

What psychology is doing in this course

- Scope of psychology and of clinical psychology.
- Why speech and hearing practice needs both.
- Terms you will meet again in assessment and learning.

Tick this level only after: Give two reasons a clinician needs a psychological frame, with examples.

6. Tue 17 Nov · Evening quest · B3.1

How language disorders present

- DSM-5 and ICD-10 as classification frames.
- Characteristics, language features, causes and comorbidities.
- Keep the conditions in a comparison table, not a paragraph.

Tick this level only after: Complete a four-column table for two conditions, book closed.

7. Wed 18 Nov · Evening quest · B3.2

Compression and signal processing

- Peak clipping versus compression.
- BILL, TILL, PILL, WDRC and syllabic compression.
- Directionality, noise reduction, frequency lowering.

Tick this level only after: Say what WDRC changes, and one listening problem it is meant to ease.

8. Thu 19 Nov · Evening quest · B3.3

Acoustics you will be asked to define

- Frequency, intensity, wavelength and resonance.
- Filters: what they pass and what they stop.
- One speech-acoustic example for each term.

Tick this level only after: Define resonance and give one speech example.

9. Fri 20 Nov · Evening quest · B3.4

How a psychological assessment starts

- Case history and mental-status examination.
- Clinical interview and clinical observation.
- What you may and may not conclude from a single sitting.

Tick this level only after: List the headings of a mental-status examination.

10. Sat 21 Nov · Evening quest · B3.1

Language sample and informal assessment

- Formal versus informal tools.
- Play, mother-child interaction and the language sample.
- Analysis of phonology, morphology, syntax and pragmatics.

Tick this level only after: Write five rules you will follow while collecting a language sample.

11. Sun 22 Nov · Sunday boss · B3.3 + B3.4

Boss: signal chain and one learning idea

- A block diagram of a recording chain.
- One principle of learning you could use in therapy.
- Error log from both papers.

Tick this level only after: Draw the chain, then state one learning principle in a therapy sentence.

12. Mon 23 Nov · Evening quest · B3.2

Electroacoustic measures

- Why EAM is done, and the bench setup.
- OSPL90, gain, full-on gain, frequency range, distortion.
- What changes the numbers, including a digital aid.

Tick this level only after: Define OSPL90 and say why a clinician looks at it before a fitting.

13. Tue 24 Nov · Evening quest · B3.1

Intervention techniques

- Purpose, goals and the choice of language.
- Incidental teaching, self-talk, parallel talk.
- Multicultural care in the activity, not as a slogan.

Tick this level only after: Script a six-line incidental-teaching episode.

14. Wed 25 Nov · Evening quest · B3.3

Recording and digital signals

- Sampling and why the rate matters.
- What a digital signal keeps and what it can lose.
- Storage of clinical recordings: principle, not a product manual.

Tick this level only after: Explain sampling rate with a one-line consequence of setting it too low.

15. Thu 26 Nov · Evening quest · B3.4

Development that language sits on

- Cognitive and emotional development at the ages you assess.
- What a delay in that domain does to a language session.
- One milestone table, birth to school age.

Tick this level only after: Name one cognitive and one emotional milestone you would ask about at age 3.

16. Fri 27 Nov · Holiday long quest · B3.2

Selection, programming and couplers

- Kanakadasa Jayanti: confirm the University holiday list.
- If it is free: candidacy, programming targets, and ear-mould acoustics.
- If class is held: evening rhythm on the same topics.

Tick this level only after: Give one reason to change an ear mould, and one programming choice that follows.

17. Sat 28 Nov · Evening quest · B3.1

AAC, the team and the family

- Aided and unaided AAC, and when each is considered.
- Medical, physio, occupational therapy and education on the team.
- Caregivers, rights and concessions.

Tick this level only after: Name three team members and the question you would ask each.

18. Sun 29 Nov · Sunday boss · All four

Boss: twenty definitions

- Five terms from each theory paper.
- Closed book first, then mark.
- Misses go to 3 December.

Tick this level only after: Twenty definitions, at least fifteen correct.

19. Mon 30 Nov · Evening quest · B3.2

Programming choices

- What you match to the audiogram and to the patient's report.
- One feature you would verify, not just enable.
- A sentence of counselling that matches the feature.

Tick this level only after: Write a four-line fitting note: audiogram, feature, verification, counsel.

20. Tue 1 Dec · Evening quest · B3.3

Information technology in the clinic

- What a clinical record must keep: identity, date, stimulus, response.
- Backup and privacy, in principle.
- One way IT changes audiometry or speech analysis.

Tick this level only after: List five fields a clinical recording file must contain.

21. Wed 2 Dec · Evening quest · B3.4

Learning and behaviour

- Classical and operant conditioning, with one clinic example each.
- Acquisition, extinction and maintenance.
- Problem-behaviour assessment versus skill assessment.

Tick this level only after: Give one operant procedure you could use for a therapy target, and its risk.

22. Thu 3 Dec · Evening quest · Weak units

Redo the red marks

- One weak unit from each paper.
- No new chapter.
- One diagram or table redrawn.

Tick this level only after: Teach the weakest unit aloud for five minutes.

23. Fri 4 Dec · Evening quest · B3.3

Instruments you must recognise

- Microphones, speakers, audiometers and analysers, as blocks.
- What each block measures.
- One artefact that ruins the measure.

Tick this level only after: Name the instrument, the quantity, and one artefact, for three tests.

24. Sat 5 Dec · Evening quest · B3.4

Neuropsychology and counselling

- What a neuropsychological screen is for, and what it is not.
- Guidance, counselling and psychotherapy: the difference.
- One counselling skill you can use this semester.

Tick this level only after: Contrast guidance and counselling with one clinic example.

25. Sun 6 Dec · Sunday boss · Two papers

Boss: timed short notes

- The two papers you trust least.
- Ten short notes, 90 minutes.
- Mark against your notes.

Tick this level only after: Finish and score the ten notes.

26. Mon 7 Dec · Final camp · B3.1

Camp: child language

- Bases, characteristics, assessment, intervention, AAC.
- One language-sample plan and one technique script.
- Gaps only. No new textbook.

Tick this level only after: A closed-book outline of assessment, then of one technique.

27. Tue 8 Dec · Final camp · B3.2

Camp: hearing aids

- Types, processing, EAM, selection, ear moulds.
- One comparison table and one EAM definition set.
- A four-line fitting note from a sketched audiogram.

Tick this level only after: OSPL90, one compression type, and one mould choice, from memory.

28. Wed 9 Dec · Final camp · B3.3

Camp: electronics and acoustics

- Signal path, acoustic definitions, sampling, instrumentation.
- Three block diagrams.
- A glossary of fifteen terms.

Tick this level only after: Three diagrams, labelled, book closed.

29. Thu 10 Dec · Final camp · B3.4

Exam eve: psychology, then stop

- A full pass of the five units before 4:30 pm.
- One mixed set from B3.1 to B3.3 only if time remains.
- No new topics after 6:00 pm. Pack the kit and sleep.

Tick this level only after: Close the books at 6:00 pm. Write the wake-up time.

Semester V

Third-year theory papers B5.1 to B5.4. B5.5 is the minor optional. B5.6 and B5.7 are clinicals and stay on the posting roster.

Theory papers in this campaign

B5.1 Voice Disorders and Laryngectomy (Practical 25 + IA 25 + Theory 50)

B5.2 Motor Speech Disorders in Children (Practical 25 + IA 25 + Theory 50)

B5.3 Paediatric Audiology (Practical 25 + IA 25 + Theory 50)

B5.4 Aural Rehabilitation (Practical 25 + IA 25 + Theory 50)

1. Thu 12 Nov · Evening quest · B5.1

Voice parameters and the mechanism

- Parameters of voice, and the respiratory-laryngeal frame.
- Pitch and loudness change, registers, quality and resonance.
- One physiologic, one acoustic and one aerodynamic correlate.

Tick this level only after: Define pitch, loudness and quality, and name the mechanism that changes each.

2. Fri 13 Nov · Evening quest · B5.2

Childhood dysarthria and apraxia, apart

- Neural maturation and sensorimotor integration, in brief.
- Childhood dysarthria, including cerebral palsy types at definition level.
- Childhood apraxia of speech: definition and characteristics.

Tick this level only after: Three points that separate childhood dysarthria from childhood apraxia.

3. Sat 14 Nov · Evening quest · B5.3

How hearing behaviour develops

- Embryology of the auditory system, clinical relevance only.
- Maturation and neuroplasticity.
- Prenatal, newborn, infant and toddler auditory behaviour.

Tick this level only after: Describe one auditory behaviour at birth and one at six months.

4. Sun 15 Nov · Sunday boss · B5.1 + B5.2

Boss: a voice scale and a differential

- GRBAS: one line on each letter.
- A differential list: dysarthria, apraxia, phonological disorder.
- Error log.

Tick this level only after: Score a described voice on GRBAS, and give the differential in three lines.

5. Mon 16 Nov · Evening quest · B5.4

What hearing loss does to communication

- Sensitive period for auditory development.
- Impact on spoken language, parent-child talk and quality of life.
- Education, employment and cost, at the level of this unit.

Tick this level only after: Give three impacts of early hearing loss, each in a different domain.

6. Tue 17 Nov · Evening quest · B5.1

Causes and voice-disorder groups

- Phonotrauma, medical causes and primary disorder.
- Functional and psychogenic presentations.
- Congenital voice disorders, as a short list.

Tick this level only after: Sort six causes into organic or functional, and justify two of them.

7. Wed 18 Nov · Evening quest · B5.2

Assessing the motor speech system

- Case history and developmental neurological signs.
- Respiration, phonation, resonance and articulation: what you watch.
- Cognitive-linguistic and language checks that travel with the motor exam.

Tick this level only after: List the speech subsystems and one task for each.

8. Thu 19 Nov · Evening quest · B5.3

Early hearing detection

- Incidence, and congenital versus acquired.
- Principles of early hearing detection and intervention.
- Joint Committee position statements: what changed, in outline.

Tick this level only after: State three principles of early hearing detection and intervention.

9. Fri 20 Nov · Evening quest · B5.4

Communication options

- Parent counselling before the choice.
- Oral, manual, cued speech and total communication.
- Auditory-oral and auditory-verbal: the difference.

Tick this level only after: Contrast auditory-verbal therapy with a total-communication approach in five lines.

10. Sat 21 Nov · Evening quest · B5.1

Voice assessment

- Referral, medical examination and the team.
- ICF and a clinical voice protocol.
- GRBAS and CAPE-V. Instrumental measures in principle, not as a brand.

Tick this level only after: List the components of a voice assessment protocol in order.

11. Sun 22 Nov · Sunday boss · B5.3 + B5.4

Boss: screening versus teaching listening

- One screening test and what a pass does not mean.
- One point you would tell a parent this week.
- Error log.

Tick this level only after: Explain a refer result to a parent, without promising a diagnosis.

12. Mon 23 Nov · Evening quest · B5.2

Managing childhood dysarthria

- Team, then the subsystems.
- Prosthetic help and AAC.
- One goal written so a parent can see it.

Tick this level only after: Write one subsystem goal with the task, the cue and the success mark.

13. Tue 24 Nov · Evening quest · B5.1

Voice therapy

- Goals and approaches.
- Vocal hygiene.
- Symptomatic and psychological approaches, and when each leads.

Tick this level only after: Write a five-point vocal-hygiene counsel for a teacher.

14. Wed 25 Nov · Evening quest · B5.3

Newborn and infant screening

- Behavioural observation and its limits.
- Objective screens, including OAE and ABR as screens.
- Universal newborn hearing screening: India and the global picture.

Tick this level only after: Give one strength and one limit of OAE as a newborn screen.

15. Thu 26 Nov · Evening quest · B5.4

Auditory learning

- Auditory training and auditory-verbal therapy, as terms.
- Home and classroom listening conditions.
- Factors that change the outcome.

Tick this level only after: List four changes that make a classroom easier to listen in.

16. Fri 27 Nov · Holiday long quest · B5.1

Laryngectomy, on the holiday

- Confirm Kanakadasa Jayanti against the University list.
- Causes, surgery types, and the team.
- Pre- and post-operative communication assessment, and alaryngeal options.

Tick this level only after: Compare two alaryngeal speech options on voice source, training and a limit.

17. Sat 28 Nov · Evening quest · B5.2

Treating childhood apraxia

- Principles of motor learning.
- Dynamic temporal and tactile cueing.
- PROMPT, signed cues and cued speech, at introduction level.

Tick this level only after: State three principles of motor learning and one therapy step that uses them.

18. Sun 29 Nov · Sunday boss · All four

Boss: twenty definitions

- Five terms from each paper.
- Closed book, then mark.
- Misses feed 3 December.

Tick this level only after: Twenty definitions, at least fifteen correct.

19. Mon 30 Nov · Evening quest · B5.3

Paediatric assessment battery

- Behavioural observation, visual reinforcement and play audiometry.
- Speech audiometry modifications for children.
- Immittance, high-frequency probe tone, and the cross-check.

Tick this level only after: Pick a test battery for a two-year-old and say why each test is there.

20. Tue 1 Dec · Evening quest · B5.2

Feeding and swallowing in children

- Phases, neural control and the related reflexes.
- Signs of paediatric dysphagia.
- Assessment and the treatment frame: position, oral-motor, non-oral feeding.

Tick this level only after: List the swallow phases and one paediatric red flag.

21. Wed 2 Dec · Evening quest · B5.4

Speech reading

- Why it is needed, and how visible speech sounds differ.
- Analytic and synthetic tests and training.
- Adults and children: what you change.

Tick this level only after: Contrast analytic and synthetic speech-reading practice with one task each.

22. Thu 3 Dec · Evening quest · Weak units

Redo the red marks

- One weak unit from each paper.
- No new chapter.
- One protocol or diagram redrawn.

Tick this level only after: Teach the weakest unit aloud for five minutes.

23. Fri 4 Dec · Evening quest · B5.3

Special populations

- Auditory neuropathy spectrum disorder.
- Additional needs, central auditory processing, and functional hearing loss.
- What the cross-check changes in each.

Tick this level only after: Give the cross-check pattern you expect in auditory neuropathy.

24. Sat 5 Dec · Evening quest · B5.4

Additional needs

- Hearing loss with blindness or cognitive disability.
- Management frames for auditory neuropathy and central auditory processing.
- Tinnitus and hyperacusis, at the level of this unit.

Tick this level only after: Name one change in management when hearing loss is not the only disability.

25. Sun 6 Dec · Sunday boss · Two papers

Boss: timed short notes

- The two papers you trust least.
- Ten short notes, 90 minutes.
- Mark them yourself.

Tick this level only after: Finish and score the ten notes.

26. Mon 7 Dec · Final camp · B5.1

Camp: voice and laryngectomy

- Mechanism, disorders, assessment, therapy, laryngectomy.
- One GRBAS practice and one alaryngeal comparison.
- Gaps only.

Tick this level only after: A closed-book voice protocol, then two alaryngeal options.

27. Tue 8 Dec · Final camp · B5.2

Camp: motor speech in children

- Differential diagnosis, assessment, dysarthria, apraxia, swallow.
- One subsystem plan and one motor-learning step.
- A feeding red-flag list.

Tick this level only after: Differential diagnosis in six lines, book closed.

28. Wed 9 Dec · Final camp · B5.3

Camp: paediatric audiology

- Development, early identification, screening, assessment, special populations.
- One age-wise test table.
- One parent explanation of a refer.

Tick this level only after: The age-wise table, from memory.

29. Thu 10 Dec · Final camp · B5.4

Exam eve: aural rehabilitation, then stop

- Communication options, auditory learning, speech reading, additional needs.
- A mixed 40-minute set from the other three papers only if the B5.4 pass is done.
- No new topics after 6:00 pm.

Tick this level only after: Stop at 6:00 pm. Pack the kit. Set the alarm.

The night before, and the morning of 11 December

- 10 December, 6:00 pm is the end of new reading in every campaign.
- Pack the hall ticket, identity card, pens, pencil, eraser and a bottle of water the night before.
- Eat, and sleep. A last unread chapter at midnight will not raise a 50-mark paper.
- On the morning of the first paper, read only the one-page map of that paper. Do not open a new unit.
- If the published timetable starts with a different paper, swap the camp days. Do not throw away the earlier levels.
- Clinical postings on examination days follow the department notice, not this booklet.

Prepared for students of the Department of Audiology and Speech-Language Pathology, Yenepoya (Deemed to be University), from the RCI curriculum (academic session 2024-25) and the Controller of Examinations notification dated 06.11.2026. Class coordinator: Mr. Hemaraja Nayaka S.
